AIR FILTER OIL

Lubricant for air filter moss

USES

AIR FILTER OIL is designed to fight against the clogging of the road and mountain motorbike engines equipped with an air filter made with moss.

Proved in competition, this product is convenient for leisure or racing uses.

Can also be used to cure the air filter moss of power agriculture machines.

PROPERTIES & ADVANTAGES

- Excellent **intrusion** power in the moss
- Creating a very efficient **protection** against dust, sludge, sand and other outside pollution.
- Decreasing the general **engine wear**
- Keeps the different engine units clean even after severe driving conditions.
- Insure long life to the engine
- Dyed blue for easier identification of the intrusion area into the filter.

OPERATING PROCEDURE

1. Clean up the filter with a solvent adapted to air filter moss (not petrol)
2. Let the filter dry
3. Spray gently AIR FILTER OIL directly on the moss.

CAUTION USE

Not for use on paper filters
