ROAD CHAIN LUBE

Lubricant for motorcycle chains with reinforced gripping

USES

Lubricant for road or competition motorcycle chains.

Particularly adapted for **high speed** uses. Anti-fling properties prevent oil projections.

PROPERTIES & ADVANTAGES

- High lubrication power
- Very good anti wear and anti corrosion properties
- Compatible with all types of toroidal joints
- Insensibility to high temperatures
- Specific formulation for an optimal adhesion, especially at high speed and in the rain
- Long life lubrication for extended life of the chain
- Excellent penetrability to keep the flexibility of the chain

OPERATING PROCEDURE

ROAD CHAIN LUBE dissolves efficiently the old greases and deposits.

It is recommended to clean up the chain before lubrication, preferably using our degreaser **MECAPROP**.

Shake the aerosol, spray on all the length of the internal face of the chain and let it penetrate a few minutes.

For off-road use, prefer YACCO Off Road Chain lube.
