DÉTARTRANT RADIATEUR

Scale remover for cooling system

USES

Formulated to clean and remove the scale deposits of the cooling system and to outperform its efficiency.

Suitable for the cooling system of cars, trucks, buses, off-highway vehicles.

MAIN CHARACTERISTICS

	Typical Values
Aspect	Liquid, fluid
Colour	Non coloured
p.H	Acid
Density at 20°C	1.12

The data given in this table are typical values from production and cannot be specifications in any case.

PROPERTIES & ADVANTAGES

- Attacks and dissolves the scale ; this is reinforced by the use of antirust specific to the acid medium.
- Prevents the perforating of the radiator because it is non corrosive regarding metals (copper, bronze, alumni, brass, steel, cast iron).
- Does not corrode the radiator tube nor the joints.

DIRECTIONS

1. Pour DÉTARTRANT RADIATEUR into the hole of the radiator (protect your hands with gloves) :
 - One dose for a tourism vehicle
 - Two doses for a heavy duty vehicleThen start on the engine for 40 minutes
2. **Drain after** when the engine is cooled
3. **Rinse carefully** twice with water before filling up the circuit with the cooling fluid.
