

L'huile des records du monde

70R

DOT 4 brake fluid -

USES

This fluid is suitable to disk and drum brakes, as well as to most of the clutch systems.
It is suitable for driving in severe service conditions (disc brakes reaching high temperatures)

MAIN CHARACTERISTICS

	Units	
Density at 20°C	Kg/m ³	1060
PH		8
Colour		yellow
Boiling point (dry)	° C	265
Cinematic viscosity at -40°C	mm ² /s	<1400

The data given in this table are typical values from production and cannot be specifications in any case.

PROPERTIES & ADVANTAGES

- High boiling point, preventing the formation of vapour lock into the system when the brakes are used severely
- **Miscible** with DOT 4 and DOT 3
- No aggressive action on seals
- High anticorrosion properties meeting the most severe requirements

CAUTION FOR USE

Do not mix with mineral hydraulic or silicone based brake fluids.

Read carefully the label and follow the MSDS instructions.

PERFORMANCES

FMVSS N°116 DOT 4
SAE J 1703 J 1704
ISO 4925
