

MOTOWASH

Biodegradable foam cleaner for motorbikes

USES

MOTOWASH is a powerful multipurpose cleaner especially designed for motorcycles.

MOTOWASH can be used on wheel rims, plastics and paints.

MAIN PHYSICAL DATA

	Method	Units	Values
Density 20°C	ASTM D4052	kg/m ³	1005
Appearance	Visual		Clear liquid
Colour	Visual	mm ² /s	Light yellow
pH			8.5
Biodegradability		%	> 95

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Dissolves all dirt (mud, brake pad dust, grease, etc.).
- ▶ MOTOWASH is acid, soda and potash free, meaning it is non-aggressive on materials.
- ▶ Leaves a perfect finish when dry.
- ▶ 2-position spray gun (“STREAM” for precise spray and “SPRAY” for wide spray) for optimal effectiveness.

INSTRUCTIONS FOR USE

- ▶ Put in the “SPRAY” position and spray the surface from 20cm.
- ▶ Let the product act for 2 minutes without letting it dry.
- ▶ Thoroughly rinse using water or a pressure steam cleaner.
- ▶ Dry with a rag for a perfect finish.

On very dirty parts:

- ▶ Put in the “STREAM” position and spray.
- ▶ Rub with a sponge or a rag.
- ▶ Thoroughly rinse with water.

PRECAUTIONS FOR USE

- ▶ On fragile surfaces: non varnished or painted aluminium, quad bodies and garden power tools, test the product first and quickly and thoroughly rinse. Do not use on trims if they are not protected.
- ▶ Aqueous solution, do not store at temperatures below 0°C.
- ▶ Read all the instructions on the label before use (MSDS at www.yacco.com). Alkaline product: avoid contact with eyes and skin, wear glasses and rubber gloves.
